CERTIFICATES

Graphics Designer

Diploma In information System Management

Certificate of participation in Aptech Vision

Certificate of participation in Techwiz4

PERSONAL PROJECTS

Hotel management system
- A C# hotel management system includes features such as room and reservation management, guest and staff management, and billing and payments. It also offers reporting and analytics, online booking integration, and security features. These functionalities streamline operations, enhance guest experiences, and provide robust management tools.

Todo list

Staff Payment Tracker
- The C# program "Staff Payment Tracker" streamlines the management of employee data for both full-time and part-time staff. It leverages inheritance and encapsulation, using a List for data management. This application allows users to add, remove, and view employee details, making it effective for monitoring and tracking staff payment information.
